Millie Maven, and the Golden Vial , by Ted Dekker and Rachelle Dekker is a book about a girl, Millie, and a couple of her classmates at? from a magic school. They go on a dangerous quest which ends with Millie finding her own value and self-worth.

This book shows a huge amount of mystery. This book is a fantasy that is good for ages about 9-13. This is the kind of book you would love to give and receive as a gift (if it is the right person). It is a really good book especially since it is very captivating, gripping, and interesting.

I like this book because it is so adventurous! This book is a super compelling book. Once you start reading Millie Maven, and the Golden Vial you won't want to stop reading it. At the end of the book, Millie finds herself. She finds her own uniqueness which is inspiring and relatable to some people.
